Laser Florence 2007 is a momentous occasion bringing together the scientific community of the International Academy Laser Medicine and Surgery, the youngest professional organisation, and The International Society for Laser Surgery and Medicine, the oldest scientific body in the world of laser technology.

Furthermore, The International Phototherapy Association and the World Federation of the Laser Surgery and Medicine Societies would also be joining in, thus making Laser Florence 2007 not merely "a window", but the "WORLD" of the laser technology itself..

As usual, Laser Florence Conference and Courses aim to enhance the knowledge in the Laser Medicine and Surgery and also the electro-optics applied in this field. All members of the scientific world are called upon to cooperate in this work where some forty countries are expected to participate. A number of other Institutions have collaborated in Laser 2007 and many young doctors will participate in the exchange of the experience of the pioneers and scientists from many countries, cultures race and religion of the five continents .

Pre-conference Courses will train the beginners and introduce them to the Laser World. The International Academy ensures a high quality of the lectures and posters presented. The accepted abstracts are published in the official journal of the IALMS, *Laser in Medical Science*, published by Springer Publisher, London. The journal and SPIE Publisher will also publish the Proceedings of the Conference. The IALMS members can look up the slides of the Conference in the member area at the site www.ialms.org.

The aim of Laser Florence organisers is always the same: to establish of an outstanding interaction between the delegates, in a unique location and an unforgettable atmosphere, where friendship, intelligence and scientific know-how are blended.

Several awards are available for the presenters of the best papers and posters and the recipients will be invited participate in the next conference of Laser Florence.

To fully understand the importance of laser Florence, 2007, there is only one way, visit the website!

Looking forward to see you here in Florence

Leonardo Longo
